Restriction/Election

Page 2

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-14, drawn to system and method for performing subscriber loop

testing in an optical network, classified in class 370, subclass 249.

11. Claims 15-20, drawn to gateway, classified in class 370, subclass 401.

2. The inventions are distinct, each from the other because of the following reasons:

Invention of Group I and Group II are related as subcombination disclosed as

usable together in a single combination. The subcombinations are distinct from each

other if they are shown to be separate usable. See MPEP 806.05(d). In the instant

case, invention I has separate utility such as subscriber loop testing, where the system

and method have a different mode of operation and effect than the network

management system used for gateway in an optical network.

3. Because these inventions are independent or distinct for the reasons given

above and the inventions require a different field of search (see MPEP 808.02),

restriction for examination purpose as indicated is proper.

4. Restriction for examination purposes as indicated is proper because all these

inventions listed in this action are independent or distinct for the reasons given above

and there would be a serious search and examination burden if restriction were not

required because one or more of the following reasons apply:

(a) the inventions have acquired a separate status in the art in view of their

different classification:

Application/Control Number: 10/716,324

Art Unit: 2616

(b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;

- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even thought the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

Application/Control Number: 10/716,324

Art Unit: 2616

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Page 4

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda Pham whose telephone number is (571) 272-3135. The examiner can normally be reached on Monday-Friday from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn D. Feild, can be reached on (571) 272-2092.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.
